

Halloween in Florida: A Nightmare on Main Street
By: Lisa V. Lesperance, Esquire

Be afraid. Be very afraid. This is very scary!

- 1) Nearly 4 million people in Florida are uninsured.
- 2) Since last year, 50,000 people have left the State of Florida.
- 3) 44% of Florida voters reported their personal finance has worsened.
- 4) There is more Medicare fraud in Miami-Dade than in any other FL county.
- 5) High school dropout rates in Florida are among the highest in the country.
- 6) Miami is rated #99 for worst place to raise children.
- 7) 17% of Florida mortgages are in foreclosure.
- 8) More than 130,000 foreclosures are expected to be filed in Miami-Dade.
- 9) Child abuse, domestic abuse and elderly abuse are on the rise.
- 10) Florida college tuition is rapidly increasing.
- 11) Property taxes, "user fees", and insurance rates are crushing families.
- 12) Florida faces another multi-billion dollar budget shortfall.
- 13) Current State leaders have no plans and no new ideas to change course.

The worst part of this Florida nightmare is that it won't be over tomorrow. Unless we make dramatic change NOW, tomorrow will only be worse because our leaders in Tallahassee just "don't get it."

I'm running for the Florida Legislature because we MUST do better. We must educate our children to compete in the 21st century. We must protect everyone's rights and get Florida back on track.

To help end the chilling tales of our state government, please contribute by [Clicking Here](#).

Hope you had a safe Halloween.
